EDUCATION

University of Illinois Chicago, Illinois

May 2026

Master's in Computer Science, College of Engineering

Relevant Coursework: Secure Web Development, Responsible AI, Information Retrieval, Advanced Software Engineering

Bangalore Institute of Technology, Bangalore

July 2020

Bachelor of Engineering in Computer Science

TECHNICAL SKILLS

Languages: Python, Golang, JavaScript, SQL, TypeScript, Java, C++.

Technologies: React, REST API, MySQL, PostgreSQL, Flask, Redis, WebSockets, RPC, MongoDB, Firebase, OAuth2, JWT, CI/CD, RAG, Agentic AI, Microsoft Office Suite

Tools: GCP, Supabase, AWS, Azure DevOps, VS Code, GitHub, Docker, Scrum, Git, Jenkins, Postman, Swagger.

PROFESSIONAL EXPERIENCE

University of Illinois

Chicago, IL

Graduate Assistant

May 2025 – Present

- Developed and maintained web applications for the College of Engineering to manage hiring requests and campus employment processes, using React, Node.js, and MySQL within an MVC-based architecture.
- Built and optimized portals supporting the Guaranteed Paid Internship Program (GPIP), streamlining student-employer workflows and improving system efficiency with tools like phpMyAdmin and RESTful API integrations.

Rexroth

Hoffman Estates, IL

Graduate Summer Intern

June 2025 – August 2025

- Developed Python applications integrating with Rexroth EAL SDK, enabling efficient automation and streamlined system interactions
- Researched expert systems and AI-driven automation techniques, providing insights to enhance intelligent control processes and contributing to new automation pipelines.

Bosch Global Software Technologies

Bangalore, India

Senior Software Engineer

December 2023 – August 2024

- Implemented and deployed task manager services for a Linux-based OS using Golang, reducing task processing time by 15% and increasing overall system performance by 4 seconds. Streamlined CI/CD processes utilizing Jenkins and Azure Pipelines.
- Designed and optimized SQL-driven REST APIs using Golang, incorporating caching mechanisms and OAuth2 for secure authentication, resulting in a 30% boost in data handling efficiency.

Bosch Global Software Technologies

Bangalore, India

Software Engineer

April 2021 – December 2023

- Engineered a sustainable app validation framework that cut manual testing time from 4 days to 5 hours, achieving an impressive reduction of over 92% in workflow inefficiencies while enhancing system performance.
- Architected a cross-platform application for Windows and Linux, utilizing Electron and Snap packages, resulting in 30+ active users and improved system performance.

PROJECTS

SyncAI – Student Assistant | Next.js, AWS, Supabase, Redis

March 2025

- Developed a personalized AI assistant for students using Python, Next.js, AWS, and Supabase to manage their academic journey, wellness checks, and study sessions.
- Integrated AWS Bedrock and OpenAI with RAG to deliver adaptive, context-aware responses to student queries.

Grocery Price Compare | React, Python, Firebase, REST API

August 2024

- Pioneered an application to optimize multi-vendor grocery price comparisons, enabling users to identify the lowest prices across vendors, enabling users to reduce expenses by up to \$50.
- Engineered backend integration using REST APIs and Firebase, applied data modeling with NoSQL to handle pricing updates.

CoffeeHouse | Python, PostgreSQL, SQLAlchemy, Railway

May 2025

- Implemented a FastAPI backend with SQLAlchemy supporting inventory management, order processing, promotions, and barista scheduling.

ACHIEVEMENT & CERTIFICATES

- POS Scholarship for Graduate Studies: Awarded to 100 recipients, supporting a Master's in Computer Science at UIC.
- Certifications:** Go, Azure DevOps, JavaScript, RAG, REST APIs, Docker, GPC.
