EDUCATION

University of Illinois, Chicago, Illinois

May 2026

Master's in Computer Science, College of Engineering

Bangalore Institute of Technology, Bangalore

July 2020

Bachelor of Engineering in Computer Science

TECHNICAL SKILLS

Languages: Python, Golang, JavaScript, SQL, Java, C++.

Technologies: React, REST API, MySQL, PostgreSQL, Generative AI, Flask, Web sockets, RPC, MongoDB, Firebase, OAuth2, JWT, CI/CD, Responsible AI, Agentic AI, Microsoft Office Suite.

Tools: GCP, Supabase, AWS, Azure DevOps, VS Code, GitHub, Docker, Scrum/Agile, Git, Jenkins, Postman, Swagger, caching.

PROFESSIONAL EXPERIENCE

University of Illinois

Chicago, IL

Graduate Assistant

May 2025 – Present

- Developed and maintained web applications for the College of Engineering to manage hiring requests and on-campus employment processes, leveraging React, Node.js, and MySQL within an MVC-based architecture.
- Built and optimized portals supporting the Guaranteed Paid Internship Program (GPIP), streamlining student-employer workflows and improving system efficiency with tools like phpMyAdmin and RESTful API integrations.

Rexroth

Hoffman Estates, IL

Graduate Summer Intern

June 2025 – August 2025

- Developed Python applications integrating with Rexroth EAL SDK, enabling efficient automation and streamlined system interactions
- Researched expert systems and AI-driven automation techniques, providing insights to enhance intelligent control processes.

Bosch Global Software Technologies

Bangalore, India

Senior Software Engineer

April 2021 – August 2024

ctrlX Automation:

- Implemented and deployed task manager services for a Linux-based OS using Angular and Golang, reducing task processing time by 15%, and increasing overall performance by 4 seconds. Streamlined CI/CD processes utilizing Jenkins and Azure Pipelines.
- Developed and published a comprehensive knowledge base using JavaScript and React, enhancing resource accessibility and reducing onboarding time by 20% through streamlined content structure and efficient version control with Git.
- Enhanced and refined REST APIs, resulting in a 25% boost in communication speed between services and maintaining 100% uptime across deployment; utilized Swagger for efficient API design, documentation, and validated using Postman/Docker.

ctrlX App Validation Framework:

- Engineered a sustainable app validation framework that cut manual testing time to 5 hours from 4 days, achieving an impressive reduction of over 92% in workflow inefficiencies while enhancing system performance.
- Designed and optimized SQL-driven REST APIs using Golang, incorporating caching mechanisms and OAuth2 for secure authentication, resulting in a 30% boost in data handling efficiency.
- Architected a cross-platform application for Windows and Linux, utilizing Electron and Snap packages, resulting in 30+ active users and improved system performance.

PROJECTS

SyncAI – Student Assistant | Python, Next.js, AWS, Supabase

March 2025

- Developed a personalized AI assistant for students using Python, Next.js, AWS, and Supabase to manage their academic journey.
- Integrated AWS Bedrock and OpenAI with various prompting engineering to deliver adaptive context-based responses.

Grocery Price Compare | React, Python, Firebase, REST API

August 2024

- Pioneered an application to optimize multi-vendor grocery price comparisons, enabling users to identify the lowest prices across vendors, with an expected reduction of up to \$50 in total grocery costs.
- Engineered backend integration using REST APIs and Firebase, applied data modeling with SQL/NoSQL to handle pricing updates.

SocialConnect | React Native, Swift, Python, Android, iOS

Jan 2024

- A cross-platform mobile app using React Native, Swift, and Go, enabling professionals in similar industries to discover and connect based on shared interests.

Blog generator | OpenAI, Python, Jupyter Notebook

June 2023

- Devised a blog generation tool utilizing OpenAI GPT models to produce content drafts in under 5 seconds, using Python & Jupyter

ACHIEVEMENT & CERTIFICATES

- POS Scholarship for Graduate Studies: Awarded to 100 recipients, supporting a Master's in Computer Science at UIC.
- Certifications:** Go, Azure DevOps, JavaScript, Git, REST APIs, Docker, GPC.
